## Vertical One Auger Trailed Mixer Wagon

---

### Vertical Mix:

- n° 1 vertical auger with long lasting tungsten knives adjustable in 2 positions
- n° 2 manually operated counterknives (opt. hydraulically)

### Advantages:

- Simple and compact machine designed for small-medium dairy farms;
- Use of any type of bale;
- Right mix and good final result in the homogeneity and softness of the TMR;
- Easy maintenance.

### Distribution:

- vers. TVs - bilateral front discharge conveyor in polyurethane (length 1900mm, width 800mm).
- vers. TVs PL - lateral front direct discharge, right hand side door, width 950mm.

### Advantages:

- Various different possibilities in order to satisfy every different need;
  - Low maintenance;
  - Continuous and homogeneous discharge.
- 

### Transmission to Augers:

- n° 1 planetary reduction gear in oil bath with 2 speed gearbox to start the auger.

### Advantages:

- Reduced power absorption and low fuel consumption;
  - High reliability of transmission;
  - Very low maintenance.
- 

### Safety:

- All machines produced in compliance with European regulation EN 703 and machine regulation 89/392 with user manual and safety accessories.
